

TechMart Electronics - Installation Guide

1. Large Appliances (TV, AC, Washing Machine, Refrigerator): Free installation is scheduled automatically after delivery. A technician will contact you within 24-48 hours to book a convenient slot.
2. Television Setup: Unbox the TV and let it reach room temperature before switching on if it was transported in cold weather. Connect the power cable, mount or place on a stable surface, then use the remote to complete on-screen Wi-Fi and account setup.
3. Air Conditioner Installation: Requires professional installation only. Do not attempt to self-install as this may void the warranty. Our technician will handle indoor/outdoor unit mounting, piping, and gas charging if needed.
4. Washing Machine Setup: Ensure the installation area has a stable water supply and drainage point within 1.5 meters. The technician will check for levelness and run a test cycle before completing installation.
5. Smartphone and Laptop Setup: No professional installation needed. Follow the on-screen setup wizard to configure Wi-Fi, accounts, and software updates on first boot.
6. Smart Home Devices: Download the TechMart Home app from the Play Store or App Store, create an account, and follow the in-app pairing instructions (usually via Bluetooth or QR code scan).
7. Installation Charges: Installation is free for large appliances within city limits. Remote area installations may incur additional charges, shown at checkout before order confirmation.
8. Rescheduling: If the scheduled installation slot doesn't work, you can reschedule up to 2 times via "My Orders" > "Installation Status" > "Reschedule".
